DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of Group I (claims 1-4 and 10-12, SEQ ID NO: 50) in Paper No. 29122004 is acknowledged. The traversal is on the ground(s) that Applicants should be allowed to select up to ten sequences. Applicants arguments were found persuasive and claims 1-4 and 10-12 will be considered with respect to the ten sequences chosen by Applicants: SEQ ID NO: 3, 7, 19, 20, 21, 24, 30, 31, 46 and 50.
2. Claims 5-9 and 13-20 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected inventions, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 29122004.
3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Claim Interpretation

4. The limitations of claims 1-3 of the cDNAs being differentially expressed in activated T cells are not taken into account when comparing the sequences with prior art, since these limitations do not pose additional structural limitations on cDNA sequences.
5. In claim 1, the limitation "a combination comprising a plurality of cDNAs that ... are selected from SEQ ID NO: 1-116" is interpreted as a combination which can contain sequences other than the ones selected from SEQ ID NO: 1-116.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

7. Claims 1, 3, 4 and 10-12 are rejected under 35 U.S.C. 102(e) as being anticipated by Lasek et al. (US 2003/0175704 A1).

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e).

This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention “by another,” or by an appropriate showing under 37 CFR 1.131.

Regarding claims 1, 3, and 10, Lasek et al. teach a nucleic acid sequence with SEQ ID NO: 15, which is 100 % identical to SEQ ID NO: 46 (see sequence alignment). Lasek et al. teach a combination of cDNA sequences with SEQ ID NO: 1-56 (page 1, [0008]). Therefore, Lasek et al. teach a combination of cDNA sequences comprising one sequence which is identical to SEQ ID NO: 46.

Regarding claim 4, Lasek et al. teach cDNAs immobilized on a substrate (page 5, [0053]).

Regarding claims 11 and 12, Lasek et al. teach cDNAs cloned into a vector and transformed into a host cell (page 6, [0070]).

Art Unit: 1637

8. No references were found teaching or suggesting claim 2 with respect to elected SEQ ID NO: 3, 7, 19, 20, 21, 24, 30, 31, 46 and 50. Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
